

April 2018- I-TEC Update

I-TEC Mission Statement

I-TEC is a non-denominational ministry utilizing volunteers to meet the technical needs of missionaries and not-for-profit organizations worldwide and to actively support local and international disaster relief.

International Technical
Electric & Construction

We purpose ... to advance the message that Jesus Christ is the light of the world by Powering Missions Worldwide

While we wait for the two 40' containers to arrive in Burundi, I thought I would share several opportunities our I-TEC team has had in the past weeks to NETWORK and work alongside other ministries.

Gary Smedley and John Bennetch were able to travel to Vanuatu with a Friends In Action team and were able to help wire a new building on the FIA property, repair the water system and make repairs to two generators that had not run in a

Just before the PowerPac left for Burundi, Michael Fisher was able to give a tour for a visiting team of students from Thaddeus Stephens College of Technology. Donald Dagen, Instructor Electro-Mechanical Technology, brought the team who all share in a campus bible study called "The Table." **It's always a blessing to be able to challenge young Christian technical students on using their skills as part of the process**

Jon Cassel is the CBN representative for Africa and lives in Dakar, Senegal. We had a unique opportunity to meet with Jon and discuss not only the Kibuye Hope Hospital project in Burundi which CBN is helping financially but also other potential projects throughout Africa where I-TEC may be able to assist.

Wondering how you may be able to become more involved, please contact us at: 570-433-0777 or email us at: contact@itec.org

Tom Garber

President / I-TEC
