

I-TEC UPDATE November 2020

An I-TEC survey team, Gene Flewelling, Michael Fisher, Don Ames, Joe Kong and Tom Garber, completed an electrical survey requested by YWAM near Orlando. It looks promising for several future projects which will include three generator installations for hurricane security and a solar installation that would eliminate their \$4,000 monthly electric bill.

International Technical
Electric & Construction

Below is a personal update from one of our staff families. Thanks for your faithful support and if you know of a church or family that would like a personal introduction to Michaels ministry with I-TEC, please let him know. Next month we will highlight Brian and Rachael Montei.

Michael Fisher serves I-TEC's purpose to "Power Missions Worldwide" with solar design, installation and service. There has been no overseas travel due to Covid-19 and the closing of country borders. However, Michael stays busy with online work, such as remote troubleshooting of existing solar systems, remote diagnosis and repair, designing & quoting future solar systems, communications with various missions and missionaries and frequent conference calls with the I-TEC team. Michael has been involved with the following ministries this year: **Haiti:** Radio Luminaire, Beracca Hospital and Young Life Ministries. **Burundi Africa:** Sister Connection and Hope Africa

University. **Congo:** Deaconess Hospital and Laban Ministries- Radio Glory. **Liberia, Africa:** ELWA **PA, USA:** Friends in Action and I-TEC Campground guest house. **FL, USA:** Youth With A Mission. Michael has also led I-TEC bible studies and devotions.

Michael's Prayer Requests: 1) Continue to pray for souls to be saved through the ministry. 2) That all systems I-TEC has installed will function as they were designed & help advance God's kingdom. 3) Additional financial support, currently at 55+%. 4) Michael & April's health. 5) God's divine protection, power, and supernatural strength, health and wisdom for Michael and April.
